

# Special Issue

## Control Problem of Nonlinear Systems with Applications

### Message from the Guest Editors

The control problem of nonlinear systems with applications is general in the actual process, and they have attracted many scholars' attention owing to the wide applications in various fields such as physics, mathematics, finance, transportation and engineer. Therefore, the analysis and synthesis of control problem play important roles in many practical systems. The aim of this special issue is to bring together the latest/innovative knowledge and analysis and synthesis of control problem of nonlinear system. All the submissions are expected to have original ideas and novel approaches. We invite authors to contribute original research articles related to all aspects of this special issue.

## About the Journal

### Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
