

Special Issue

Advanced Methods in the Mathematical Modeling of Economics, Econometrics, and Financial Management, 2nd Edition

Message from the Guest Editors

This Special Issue is a continuation of our previous Special Issue, entitled “Advanced Methods in the Mathematical Modeling of Economics, Econometrics, and Financial Management”. Mathematical modeling is fundamental academic matter for covering the endless drivers of change in economics. But it also provides a preferred tool for economic development, sustainable business finance, and prosperous corporate life. This Special Issue focuses on the use of advanced methods of mathematical modeling for the topics presented and reviews recent methods used to face the challenges of business model transformation and the optimization of corporate finance. Issues also include how to adapt to new industries, products, ideas, and other parts of the global market and still be profitable. We encourage researchers to submit original manuscripts that address the methods related to the theory and application of mathematical modeling in economics, econometrics, and financial management. Each contribution must include a unique research strategy and approach.

Guest Editors

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
