

# Special Issue

## Deep Learning in Image Processing and Scientific Computing

### Message from the Guest Editors

Recent advancements in the application of deep neural networks in large-scale visual recognition challenges, as well as in other domains, has led to an explosion of research in the field of deep learning. Deep-learning-related research is revolutionizing various industries and domains. Some ongoing research areas include the theoretical understanding of generalization, interpretable deep learning, robustness and adversarial attacks, training efficiency and transfer learning, etc. The primary objective of this Special Issue is to address cutting-edge advancements in the rapidly evolving field of deep learning. In particular, we invite authors to submit papers that showcase the robustness and generalizability of their models or methodologies. By gathering such diverse and innovative works, we aim to present a compelling collection that captures the forefront of deep learning research. Potential topics include, but are not limited to, the following: general deep learning, deep learning architectures, trustworthy deep learning, image and video understanding, image and video synthesis, deep learning in imaging applications and deep learning for scientific computing.

### Guest Editors

Dr. Xuqing Wu

Department of Information Science Technology, University of Houston,  
Houston, TX 77004, USA

Dr. Siyu Huang

School of Computing, Clemson University, Clemson, SC 29631, USA

### Deadline for manuscript submissions

31 August 2025

## About the Journal

### Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
