Special Issue

Dynamical Systems and System Analysis

Message from the Guest Editor

The Editors of this Special Issue are pleased to invite authors to submit their original results related to dynamical systems which can be described with the help of differential or difference equations, partial and lattice differential equations, differential equations on graphs, delayed equations, and even studies related to dynamical systems on time scales. This Special Issue will also publish contributions related exclusively to system analysis, and we hope to find, among the results, new approaches for the qualitative theory of dynamical systems that could inspire further achievements in the field.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:
JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
