Mathematical Modeling and Analysis in Pattern Recognition and Computer Vision

Message from the Guest Editor

Mathematical Modeling and Analysis in Pattern Recognition and Computer Vision are essential due to their rigorous framework for formulating and analyzing problems, which is crucial for ensuring the robustness and accuracy of algorithms that process large volumes of visual data. The integration of new mathematical techniques fosters interdisciplinary collaboration, leading to innovative discoveries and accelerating progress. Robust mathematical models are key to improving the accuracy and reliability of practical applications. Additionally, these approaches enable the creation of adaptable models that can generalize across various contexts, driving the development of flexible technologies. Therefore, advances in mathematical modeling are critical to advancing the field and transforming theoretical innovations into impactful real-world applications.

I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
