

Special Issue

Fuzzy Sets and Fuzzy Systems

Message from the Guest Editors

Over time, the concepts of cost, time, delivery, space, quality, durability, and price began to gain more significance in the emerging trends of information technology when it comes to solving managerial decision-making problems in supply chain models, transportation issues, inventory control issues, etc. Additionally, in uncertain situations, competition is becoming more difficult by the day. In these situations, the demand is either still unmet or remarkably hard to meet in the real-world market. Due to their numeric membership functions, fuzzy sets cannot always represent this uncertainty explicitly. However, it has been discovered that type two random fuzzy, bifuzzy, and fuzzy random sets are more suited to account for intrinsic uncertainty. We invite both academics and industrial engineering, as well as management professionals, to submit original high-quality articles to this Special Issue addressing novel ideas in the following areas: green supply chains, inventory control issues, transportation issues, and novel information for topics from both theoretical and practical perspectives in fuzzy, random fuzzy, bifuzzy, type two fuzzy, and random environments.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
