

Special Issue

Recent Trends and Advances in the Natural Language Processing

Message from the Guest Editors

This Special Issue offers a timely collection of original contributions of works to benefit the researchers and practitioners in the research fields of new trends and applications in natural language processing. The Special Issue focuses on the use and exploration of new technologies (see keywords) for NLP-related tasks, including (but not limited to) information extraction, information retrieval, sentiment analysis, machine translation, text summarization, and dialogue systems.

Keywords

- language model
- few-shot learning for NLP
- reinforcement learning for NLP
- lifelong learning for NLP
- graph learning for NLP
- multilingual NLP
- multimodel NLP
- reinforcement learning for NLP
- intelligent applications with NLP

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
