

Special Issue

Methods, Analysis and Applications in Computational Neuroscience

Message from the Guest Editor

Nowadays, bio-inspired algorithms play an important role in the development of modern applications. In particular, applications such as control theory, cybernetics, quantitative psychology, machine learning, artificial neural networks, artificial intelligence and computational learning theory have been significantly improved since most of them are highly inspired by diverse neural phenomena. Therefore, the study of the complex biophysical characteristics of neurons potentially allows for the development of better neurobiological computational systems. Inspired by differing dynamics and modulations, among others, recent neural algorithms have been created. These models have been proven to improve the computational capabilities of conventional systems. In addition, most of them have been used in practical applications. This Special Issue aims to publish significant contributions considering theoretical approaches and practical problems in computational neuroscience.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
