

Special Issue

Applications of Fuzzy Set Theory and Decision-Making in Business, Finance, and Engineering Using Empirical Mathematical Models

Message from the Guest Editors

This Special Issue seeks to bridge the gap between theoretical research and practical application, fostering a deeper understanding of how fuzzy logic and decision-making models can solve complex problems in business, finance, fintech, and engineering. We encourage researchers and practitioners to submit their innovative work, which will provide insights into these evolving fields and contribute to their advancement.

- Risk management in business and finance;
- Crisis management and business resilience;
- Optimization of investment strategies;
- Financial forecasting and market analyses;
- The evaluation of economic shocks and recessions and their impact on different stakeholders;
- Engineering design and computer-aided engineering;
- The internet of things and internet of beings;
- Intelligent and safe transport;
- Applications of artificial intelligence models;
- Supply chain logistics and decision support systems;
- The circular economy and ESG strategies;
- Social networks and the economic development of emerging economies.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
