

Special Issue

Metaheuristic Algorithms, 2nd Edition

Message from the Guest Editor

Metaheuristic algorithms continue to be at the forefront of research, attracting attention across various fields including engineering, transportation, planning, logistics, and beyond. These algorithms are effective for solving complex problems in combinatorial optimization, often yielding high-quality solutions with less computational effort compared to traditional optimization methods. Building upon the success of the first edition, the Special Issue titled “Metaheuristic Algorithms, 2nd Edition” aims to showcase recent advancements in both combinatorial and continuous optimization problems. Authors from academia and industry are invited to submit original research and review articles to share their latest findings in this dynamic and evolving domain.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
