

Special Issue

Modelling and Analysis in Biomathematics

Message from the Guest Editors

The purpose of this Special Issue is to gather the latest contributions with the recent advances in the theory and applications of mathematical models arising in the broad fields of cell and developmental biology, systems biology, ecology, epidemiology, population dynamics, medicine, pharmacy, therapy and vaccination strategies, biotechnology, bioengineering, environmental science, etc. We invite the authors to submit original research articles and high-quality review articles in biomathematics obtained from development, analysis, and simulation of mathematical models based on ordinary differential equations, difference equations, dynamical systems, partial differential equations, integrodifferential equations, impulsive differential equations, fractional order differential equations, variational methods, optimal control, Markov models, and others.

Guest Editors

Prof. Dr. M. Victoria Otero-Espinar

Departamento de Estatística, Análise Matemática e Optimización,
Instituto de Matemáticas, Universidade de Santiago de Compostela,
15705 Galicia, Spain

Prof. Dr. Àngel Calsina

Departament de Matemàtiques, Universitat Autònoma de Barcelona,
Bellaterra, Spain

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
