

Special Issue

Modeling and Numerical Analysis of Energy and Environment 2021

Message from the Guest Editor

Energy and environment are both important topics nowadays in order to sustainably develop our world. This Special Issue focuses on mathematical modeling and numerical simulation of the energy and environmental systems linked to different applications, such as renewable energy (onshore and offshore wind energy, thermosolar and photovoltaic energy, biomass, etc.), nuclear fusion and study of plasma, shallow water models, water, air or soil pollution, multiphase flows or energy balance models relevant in architecture. The mathematical models involved in those applications include heat and mass transfer problems, Navier–Stokes models, magneto-hydrodynamic (MHD) equations, Euler equations for gas dynamics, shallow water models or advection–reaction–diffusion equations, to name a few. With the aim of solving mathematical models, numerical schemes based on finite volume methods, finite element methods, finite difference techniques and the discontinuous Galerkin approach are interesting for this Special Issue.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
