

Special Issue

Multidisciplinary Models and Applications of Machine Learning and Computational Statistics

Message from the Guest Editor

Machine learning (ML) algorithms have been applied successfully in many disciplines, taking on various types of data that were not accessible before, including big-data and high-dimensional data.

In this special issue we are interested in multidisciplinary research of machine learning and other disciplines, such as biology, chemistry, medicine and psychology.

Specifically, we are interested in case-studies that demonstrate how the ML methodology is improved by the added value that a domain expert brings to the research team.

A domain expert may contribute their special knowledge in key junctions of the data mining process: data preprocessing, feature engineering, choosing the right ML model, tweaking the model in a non-standard way, and interpretation. One such example is ML-assisted drug design, where the knowledge of the chemist is crucial to extracting relevant features from the molecule.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
