

# Special Issue

## Mathematical Methods on Control Engineering in Mechatronics: Advances and Challenges

### Message from the Guest Editor

The proposed Special Issue aims to highlight the latest advances and challenges in the application of control engineering in mechatronics. The Special Issue will focus on the following topics:

- Advanced control algorithms for mechatronic systems, including model predictive control, adaptive control, and nonlinear control;
- The control of multi-domain systems, such as systems with mechanical, electrical, and thermal domains;
- The control of uncertain systems, including systems with parametric uncertainty, unmodeled dynamics, and nonlinearities;
- The control of networked mechatronic systems, including distributed control, cooperative control, and communication networks;
- Applications of control engineering in mechatronics, including robotics, autonomous systems, and smart manufacturing;
- Applications of control engineering in stationary energy storage systems.

The Special Issue will be of interest to researchers and practitioners in the fields of control engineering, mechatronics, robotics, and related fields. The Special Issue will provide a comprehensive overview of the latest advances and challenges in the application of control engineering in mechatronics.

---

### Guest Editor

Dr. Aydin Azizi

School of Engineering, Computing and Mathematics, Oxford Brookes University, Headington Campus, Oxford OX3 0BP, UK

## About the Journal

### Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
