

Special Issue

New Progress in General Topology and Its Applications

Message from the Guest Editors

General Topology constitutes an important mathematical branch not only for its ability to develop its own disciplinary body but also largely due to its basic nature, for its capacity for interaction and application in other fields of both mathematics and other scientific areas. The main purpose of this issue is the publication of high-quality papers that gather new progress in any area of general topology (MSC 54) as well as in those where the use of methods and techniques from it is significant. Furthermore, non-elementary applications are also welcome. Of course, the keyword list below is not exhaustive.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
