Special Issue

Numerical, Mathematical and Machine Learning Models in Science and Technology of Space and Matter

Message from the Guest Editors

During the last decades, and thanks to the advancement of computing capabilities, big data as well as machine and deep learning models have demonstrated their utility in different fields of science and technology. Two areas where these methodologies have arrived to stay are astronomy and particle physics.

This Special Issue is justified as, nowadays, there remain numerous open challenges, including deepening the mathematical foundations of all these methodologies. Not only is the development of new models that can cover real needs required but, also, some theorical aspects are still unclear. Topics such as alternative methods to stochastic gradient for the training of neural networks, development of new cost functions able to reduce overfitting, and methodologies for the selection of the best neural networks topology are examples of some of the issues that remain open.

The objective of this Special Issue is to bring together articles on new theoretical advances and their applications to astronomy and particle physics, giving more light to their theorical foundations.

Guest Editors

Dr. Fernando Sánchez Lasheras

Prof. Dr. Maria Luisa Sanchez Rodríguez

Prof. Dr. Javier Fernández Menéndez

Deadline for manuscript submissions

closed (31 December 2021)

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:
JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
