

# Special Issue

## New Trends in Stochastic Processes, Probability and Statistics

### Message from the Guest Editors

The primary focus of this Special Issue is modern areas of the theory of stochastic processes and mathematical statistics. Topics of interest but are not limited to:

- Processes enabling the study of the particle systems' evolution where each particle is born, dies and moves through space in different environments as well as their applications in various fields, from statistical physics to population dynamics;
- Prevalent ideas in the field of branching processes, including controlled random processes, branching random walks in inhomogeneous and random environments, and Markov and non-Markov processes with discrete or continuous time;
- Study of stochastic processes, combining the martingale technique and spectral approach for analysis of the spectrum of high-dimensional random matrices;
- Statistical approaches that might be employed to recognize the effect of intermittency on empirical data, and to show that external randomization can enable test statistics to be better approximated due to their limiting distributions;
- Identification of the parameters of random processes and the development of nonparametric statistical methods.

---

### Guest Editors

Prof. Dr. Alexander Tikhomirov

Prof. Dr. Vladimir Ulyanov

Prof. Dr. Elena Yarovaya

## About the Journal

### Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
