Special Issue

Theory and Application of Algebraic Combinatorics, 2nd Edition

Message from the Guest Editors

Algebraic combinatorics is a multidisciplinary area due to its overlap with other branches of mathematics. Many results and methods of algebraic combinatorics can be observed in proofs in other research areas. This Special Issue entitled "Theory and Application of Algebraic Combinatorics, 2nd Edition" aims to publish papers with new results in either specific problems of algebraic combinatorics or those that demonstrate their relationships with other mathematical areas. Potential topics of this Special Issue include, but are not limited to, the following:

- Orthogonal arrays and their generalizations;
- Enumeration problems, power series, and generating functions;
- Automorphism groups of finite structures and codes;
- Finite projective space;
- Projective Hjelmslev geometries and codes over finite chain rings;
- Free associative algebras over fields with a positive characteristic:
- Non-commutative invariant theory;
- Algebraic curves over finite fields:
- Error-correcting codes, network coding, and optical orthogonal codes;
- Algorithms and software tools for algebraic combinatorics, coding theory, and cryptography.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University, The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
