

Special Issue

Mathematical Modeling in Chaotic and Bio-Inspired Systems

Message from the Guest Editor

Mathematical modeling allows us to analyze and describe the nonlinear behavior of nature's systems and phenomena, which can be synthesized using soft- and hard-processors, electronic devices, and computational systems. Moreover, with the support offered by neural processing and deep learning systems, it is possible to simulate or emulate the behavior of systems applicable in communications, computing, big data, aeronautics, transportation, electrification, electromobility, medicine, and industrial fields, among others. This Special Issue provides a platform for researchers from academia and industry to present novel and unpublished work related to the mathematical modeling of chaotic and bio-inspired systems with the idea of promoting new research in emerging fields for the analysis and synthesis of nonlinear systems in nature.

Guest Editor

Prof. Dr. Ruben Vazquez-Medina

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
