Special Issue

Game Theory and Industrial Organization

Message from the Guest Editors

This Special Issue aims to collect original, high-quality applications of game-theoretic methods to the broad field of industrial economics. A non-exhaustive list of topics includes: collusion, monopolistic competition, horizontal and vertical differentiation, dynamic and Stackelberg games, entry games, evolutionary games, models with myopic, adaptive and farsighted players, asymmetric information, moral hazard, learning, network and information sharing games, *et cetera*. Emphasis will be put on some important and promising recent developments within the discipline, such as lattice theory and supermodular and aggregative games applied to address novel as well as more classic industrial organizational issues.

Guest Editors

Prof. Dr. Marco A. Marini

Department of Social and Economic Sciences, Sapienza University of Rome, 00185 Rome, Italy

Prof. Dr. Iwan Bos

Department of Organisation, Strategy and Entrepreneurship, Maastricht University, Maastricht, The Netherlands

Deadline for manuscript submissions

closed (30 June 2024)

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and Informatics, De Montfort University, The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:
JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
