Mathematics and Economic Modeling

Message from the Guest Editors

The global financial crisis, the sovereign debt crisis, and especially the health crisis have shown that the world economy is undergoing tests that can affect long-term economic stability. We believe that the prevention of such crises can only be achieved by modeling economic phenomena at the micro- and macroeconomic level. Through their studies, researchers can highlight the factors and establish the causes that can influence the financial balance of banks, companies, and local administrations. Hence, studies in this field are important in order to emphasize the link between economic phenomena and their factors of influence in order to prevent new financial crises triggered by the current health crisis.

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana

School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.4 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
