

Special Issue

Recent Advances of Mathematics in Industrial Engineering

Message from the Guest Editors

In the era of Industry 4.0, real-time data collection and analysis based on mathematical theory is extremely important. Creating active information systems which are characterized by the ability to learn and adapt to rapidly changing conditions supporting real decision-making processes would not be possible without the use of calculus, fuzzy logic solutions, statistics, quantitative methods, neural networks, big data analysis, and much more. It is necessary for the development of the industrial engineering area to exchange knowledge and experience in this area, which is the main purpose of this Special Issue. Editors are invited to submit original and high-quality papers on the application of mathematics to industrial engineering education.

Guest Editors

Dr. Idelfonso B. R. Nogueira

Department of Chemical Engineering, Norwegian University of Science and Technology, 7034 Trondheim, Norway

Dr. Jozef Husar

Department of Industrial Engineering and Informatics, Faculty of Manufacturing Technologies with a Seat in Prešov, Technical University of Košice, Prešov, Slovakia

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

Editor-in-Chief

Prof. Dr. Francisco Chiclana
School of Computer Science and Informatics, De Montfort University,
The Gateway, Leicester LE1 9BH, UK

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
