

# Special Issue

## Quantitative Methods for Social Sciences

### Message from the Guest Editors

One of the most important contributions to social science during the last decades has been the attempt to move this academic discipline from a largely axiomatic and deductive discipline to a more empirical one. Nowadays, the methodologies through which researchers explore social issues, increasingly incorporates quantitative approaches. The present Special Issue focuses on the publication of research studies that rely on the use of classical or novel applied mathematics techniques as the way of approaching the study of social issues in fields such as economics, education, psychology, sociology and political science. Authors are welcome to share the files which provide the full details of the calculations and experimental procedures used as supplementary material that accompany their works. Potential topics include, but are not limited to, the following:

- Applied mathematics
- Quantitative methods
- Statistics
- Social science
- Economics
- Education
- Psychology
- Sociology
- Political science

---

### Guest Editors

Prof. Dr. Gregorio Giménez Esteban

Faculty of Economics and Business, University of Zaragoza, 50009 Zaragoza, Spain

Dr. Javier Valbuena

Department of Applied Economics, University of Zaragoza, 50005 Zaragoza, Spain

## About the Journal

### Message from the Editor-in-Chief

The journal *Mathematics* publishes high-quality, refereed papers that treat both pure and applied mathematics. The journal highlights articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, statistics, finance, computer science, engineering and sociology, particularly those that stress analytical/algebraic aspects and novel problems and their solutions. One of the missions of the journal is to serve mathematicians and scientists through the prompt publication of significant advances in any branch of science and technology, and to provide a forum for the discussion of new scientific developments.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Mathematics) / CiteScore - Q1 (General Mathematics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
