Special Issue

Computational Mathematics and Applied Statistics

Message from the Guest Editor

Rapid advances in modelling research have created new challenges and opportunities for statisticians. Statistical inference in observational studies and many other emerging fields have motivated statisticians world-wide to develop cutting-edge methods and analytical strategies. The main aim of this Special Issue will be to showcase the applications and methodological research in all fields of computational statistics. This Special Issue will provide a forum for computer scientists, mathematicians, and statisticians working in a variety of areas in statistics, including biometrics, econometrics, data analysis, graphics, and simulation. The submission for consideration should involve a significant novel methodological, computational, or advanced new methodology in computational mathematics, statistical Inference, engineering, or biology in order to be considered...

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Mathematics, Interdisciplinary Applications)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.3 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
