

## Special Issue

# Discontinuous Galerkin Methods

### Message from the Guest Editor

Discontinuous Galerkin methods are widely employed in computational science and engineering fields, as they offer accurate and efficient simulations. The development, analysis and applications of discontinuous Galerkin methods have thus stimulated significant research. This Special Issue aims to create a platform for papers for the exchange of knowledge on all aspects of discontinuous Galerkin methods. This Special Issue will present the latest scientific advances, reviews, communications, and short notes considering discontinuous Galerkin methods.

---

### Guest Editor

Prof. Dr. Eric T. Chung

Department of Mathematics, Chinese University of Hong Kong, Hong Kong, China

## About the Journal

### Message from the Editorial Board

---

#### Editors-in-Chief

Prof. Dr. Oliver Schütze  
Depto de Computacion, Cinvestav, Mexico City 07360, Mexico

Prof. Dr. Gianluigi Rozza  
SISSA mathLab, International School for Advanced Studies, Office A-435, Via Bonomea 265, 34136 Trieste, Italy

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

##### Journal Rank:

JCR - Q2 (Mathematics, Interdisciplinary Applications)  
Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.3 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).

##### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
