Special Issue

Discontinuous Galerkin Methods

Message from the Guest Editor

Discontinuous Galerkin methods are widely employed in computational science and engineering fields, as they offer accurate and efficient simulations. The development, analysis and applications of discontinuous Galerkin methods have thus stimulated significant research. This Special Issue aims to create a platform for papers for the exchange of knowledge on all aspects of discontinuous Galerkin methods. This Special Issue will present the latest scientific advances, reviews, communications, and short notes considering discontinuous Galerkin methods.

Guest Editor

Prof. Dr. Eric T. Chung

Department of Mathematics, Chinese University of Hong Kong, Hong Kong, China

Deadline for manuscript submissions

closed (15 November 2022)

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Oliver Schütze

Depto de Computacion, Cinvestav, Mexico City 07360, Mexico

Prof. Dr. Gianluigi Rozza

SISSA mathLab, International School for Advanced Studies, Office A-435, Via Bonomea 265, 34136 Trieste, Italy

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Mathematics, Interdisciplinary Applications)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.3 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
