Topical Collection

Mathematical Modelling of COVID-19

Message from the Collection Editor

COVID-19 pandemic has been affecting our world for more than one year. Scientists from many different fields have been working hard, trying to use their skills and knowledge on the control and eradication of the pandemic. Mathematical models are one of the tools that has been used to model and predict the evolution of the pandemic under different scenarios. This Collections aims to gather original scientific papers where different mathematical tools are used to study the transmission dynamics of SARS-CoV-2 and discuss control strategies of COVID-19 pandemic. Topics of interest include, but are not limited to: mathematical modeling, optimization methods, complex networks, stochastic and hybrid models applied to COVID-19. Dr. Cristiana J. Silva

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Oliver Schütze Depto de Computacion, Cinvestav, Mexico City 07360, Mexico

Prof. Dr. Gianluigi Rozza SISSA mathLab, International School for Advanced Studies, Office A-435, Via Bonomea 265, 34136 Trieste, Italy

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Mathematics, Interdisciplinary Applications)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.3 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
