### Mathematical and Computational Modelling in Mechanics of Materials and Structures

### Message from the Guest Editors

Structural design in any engineering field is led by iterative optimization processes that traditionally involve operational experience, and at the same time rely on the mathematical behavior of structural theories. In recent vears, the characterization and analysis of advanced materials has become fundamental for predicting structural behavior. This is mainly due to the fact that composites and lattice structures are spreading more and more in the industry, pushing researchers towards analyzing and modeling the anisotropic and nonlocal behaviors, as well as the multi-fields, of materials and structures. The present Special Issue focuses on two main aspects: first, the material, with its design and characterization: second, the structure, with its modelling and solution. As far as materials are concerned, lattice, anisotropic, nonlocal and multiphysics behaviors are considered. On the structures side, the Special Issue aims to attract contributions on the topics of multi-scale modeling, 3D-printed components and computer-aided structural engineering.

## About the Journal

### Message from the Editorial Board

### **Editors-in-Chief**

Prof. Dr. Oliver Schütze Depto de Computacion, Cinvestav, Mexico City 07360, Mexico

Prof. Dr. Gianluigi Rozza SISSA mathLab, International School for Advanced Studies, Office A-435, Via Bonomea 265, 34136 Trieste, Italy

### **Author Benefits**

### **High Visibility:**

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

### Journal Rank:

JCR - Q2 (Mathematics, Interdisciplinary Applications) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 25.3 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).

#### **Recognition of Reviewers:**

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
