Deadline for manuscript  
submissions:

**30 September 2024**

### Message from the Guest Editors

Fractures of the distal radius represent the most common orthopedic injuries: one out of every six fractures presented at emergency departments is a distal radius fracture. Almost two-thirds of these fractures are displaced and need to be reduced. Osteoporosis is strictly associated with these fractures, leading to an additional investigation with a dual-energy X-ray absorptiometer after trauma. Both conservative and surgical options are available for these fractures, with their own peculiar advantages and complications. The choice of treatment depends on age, lifestyle, functional demands, limb dominance, type of fracture, severity, alignment of the fracture, and condition of the soft tissue. Treatment by closed reduction and cast immobilization is still valid, even if it may lead to poor radiological results and displacement, especially in worst fracture patterns. Several surgical options for distal radius fractures have been described.

We encourage you and your co-workers to submit your articles reporting on this topic. We also welcome reviews or original articles, with the aim of updating the diagnosis and treatment of these fractures.

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
