Deadline for manuscript submissions:

closed (10 April 2023)

## **Message from the Guest Editors**

Aortic arch surgery has evolved significantly with regard to perioperative management, surgical strategies and commercially available devices over the past 10 years. As one of the most challenging and complex endeavours in modern cardiovascular surgery, successful aortic arch surgery requires thorough preoperative planning by a dedicated interdisciplinary aortic team. Organ protection by temperature management, use of various cannulation intraoperative sites and the application of neuromonitoring are key factors that have to be considered by the operating surgeon in the elective and emergent setting and are under constant advancement to further reduce the operative morbidity and mortality in high-risk patients.

This special Issue aims to explore the latest updates in the management of open, hybrid and endovascular aortic arch surgery. Recent developments and the current trends to successfully treat the aortic arch are thoroughly discussed by leading experts in the context of new experimental and recent clinical studies.

## **Editor-in-Chief**

## Prof. Dr. Edgaras Stankevičius Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

## **Message from the Editor-in-Chief**

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed,

MEDLINE, PMC, and other databases.

Journal Rank: CiteScore - Q2 (General Medicine)
