Marche, Ancona, Italy

Deadline for manuscript  
submissions:

**closed (29 February 2024)**

### Message from the Guest Editor

Echocardiography, cardiac CT, cardiac MRI, and nuclear medicine are consolidated diagnostic modalities, and the introduction of dual-source and dual energy CT, photon-counting CT, new MRI sequences and hybrid nuclear imaging has substantially improved the detection and evaluation of cardiac disease.

The possibility to perform stress–rest imaging exams have enlarged the application of cardiac imaging in ischemic heart disease.

In addition, invasive imaging methods such as coronary angiography, transcatheter electrophysiological mapping and cardiac allow not only allow the diagnosis but also the therapeutic approach to ischemic and non-ischemic heart disease.

Finally, the introduction of artificial intelligence into clinical practice is modifying the diagnostic possibilities by assisting specialists in the detection and interpretation of images, improving the diagnostic performance.

The purpose of this Special Issue is to present a wide range of scientific papers including actual cardiac imaging modalities, the latest developments, their actual and future applications in the heart disease and interesting clinical cases of integrated use of the cardiac imaging modalities.

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

**Journal Rank:** CiteScore - Q2 (*General Medicine*)
