Environmental, Metabolic and Drug-Induced Stress Pathology – Diagnosis, Pharmacokinetics, Pharmacodynamics, and Modern Therapeutic Approaches

Guest Editor:

Prof. Dr. Cornelia Amalinei

Department of Morphofunctional
Sciences I, “Grigore T. Popa”
University of Medicine and
Pharmacy, Iasi, Romania

Deadline for manuscript
submissions:

closed (15 November 2023)

Message from the Guest Editor

Numerous types of stress factors or stressors may act on humans, either environmental (thermal stress or viral infections), metabolic (high body-mass index), or drug-related (alcohol, nicotine, anesthetic drugs, or opioids), frequently associated with oxidative stress. On the other hand, the knowledge of pharmacokinetics and pharmacodynamics may use their manipulation in therapy, such as therapeutic hypothermia, pharmacokinetic–pharmacodynamic (PKPD) models of reversal of opioid-induced respiratory depression (OIRD), or novel nano-based drug delivery systems. This Special Issue aims to collect articles specifically related to the influences of different types of stressors in pathology, new tools of diagnosis, and the possibilities to exploit their pharmacokinetics and pharmacodynamics, such as therapies using microparticles and nanoparticles, along with reviews providing information on the state of the art, ongoing research, and future perspectives in this field.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (*General Medicine*)
