### Message from the Guest Editors

Dear Colleagues,

Acute pancreatitis is the most common gastrointestinal disorder leading to hospital admission in the United States, and its incidence is rising steadily. Severe cases carry a high risk of long-term morbidity and mortality. Unfortunately, no specific drug or treatment is available for acute pancreatitis, but it is possible to optimize the general management of these patients to improve outcomes. There are several interesting research topics in the field of acute pancreatitis with open questions. Additionally, with hypertriglyceridemia-induced pancreatitis, therapeutic plasma exchange might be beneficial; however, patient selection is a crucial aspect of this intervention. In gallstone pancreatitis, the judicious use of ERCP is a key point in the treatment.

The aim of this Special Issue is to collect current research in the field of acute pancreatitis. We expect original and review articles about the broad aspects of severe acute pancreatitis management.

Key words: acute pancreatitis; risk assessment; enteral nutrition; antibiotic therapy; ERCP; plasma exchange; endoscopic drainage

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), and [other databases](#).

**Journal Rank:** CiteScore - Q2 (*General Medicine*)
