Deadline for manuscript submissions:
30 September 2024

Message from the Guest Editor

The aim of this Special Issue is to collect and present the latest advances in the pathogenesis, diagnosis and therapies of chronic liver diseases. The scope of this Special Issue includes, but is not limited to, diagnostic, predictive and therapeutic studies. We are interested in exploring the impact of hepatology research in a clinical setting, with regards to pre-clinical data record, clinical data management, accuracy of diagnosis and new treatment options.

1. Preclinical and clinical studies on the new diagnostic tools and therapies related to chronic liver diseases;
2. Systematic reviews that explore the current landscape on chronic liver diseases in clinical practice;
3. Meta-analysis to summarize the trends and the evidence of international literature;
4. Case studies that highlight significant successes or challenges encountered in the application of new treatment of chronic liver disease in real-life;
5. Contributions exploring the current approach and novelties in the pre-clinical and clinical setting of chronic liver diseases;
6. Articles discussing future perspectives and new challenges in the area of chronic liver diseases.
