New Strategies for the Diagnosis and Treatment of Rheumatic and Musculoskeletal Diseases

Message from the Guest Editors

This Special Issue will discuss the use of diagnostic tools in rheumatic and musculoskeletal diseases, focusing on new imaging techniques and laboratory tests. The management of the above-mentioned pathologies include not only pharmacological treatments but also rehabilitation approaches including modern technologies (assistive technologies, virtual motion, robotic-assisted systems, or interactive wearable systems).

In addition to diagnostics, modern technologies play a crucial role in the rehabilitation of patients with rheumatic and musculoskeletal diseases. Telemedicine platforms enable remote consultations, allowing patients to receive expert care without the need for travel, which can be particularly beneficial for those with mobility challenges. Wearable devices, such as smartwatches and fitness trackers, can monitor patients' physical activity levels and provide real-time feedback on their rehabilitation progress, promoting adherence to exercise regimens and encouraging a more active lifestyle.

For this Special Issue, we welcome original articles and reviews.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
