Perioperative Medicine: Optimizing Outcomes Through Anesthesia

Message from the Guest Editor

Perioperative medicine is evolving toward a patient-centered approach, with anesthesia playing a pivotal role in optimizing surgical outcomes and enhancing recovery. Advances in anesthetic techniques tailored to specific surgical procedures and patient profiles have demonstrated potential in reducing complications, improving survival and quality of life.

This Special Issue, "Perioperative Medicine: Optimizing Outcomes Through Anesthesia", will showcase high-quality research that advances perioperative care strategies to improve patient safety, enhance recovery, and reduce postoperative complications. Submissions may explore the following topics:

- Tailored anesthetic approaches for specific surgeries;
- Enhanced recovery protocols;
- The impact of anesthesia on long-term outcomes;
- Postoperative pain management;
- Perioperative critical care optimization.

We encourage the submission of preclinical studies, clinical research, and literature reviews that contribute to advancing perioperative medicine and improving patient outcomes.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief
