Anterior Cruciate Ligament (ACL) Injury

Message from the Guest Editors

Anterior cruciate ligament (ACL) injury is one of the most commonly treated injuries in sports medicine surgery. Currently, many kinds of surgical treatment options are being developed for ACL injuries and disorders. There have been many developments in ACL surgery; surgeons are focusing on methods to make the procedure less invasive, more precise, and last longer, helping to lessen the likelihood of revision, secondary surgeries or persistent instability. In this Special Issue of *Medicina*, we aim to provide an overview of the recent advances in the field of ACL surgery, outcomes and rehabilitation. Therefore, researchers in the field of ACL surgery are encouraged to submit original articles or reviews to this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
