Special Issue

Adenomyosis and Endometriosis-Related Infertility

Message from the Guest Editors

This Special Issue aims to provide an overview on endometriosis and adenomyosis-related infertility. Treatment strategies for infertility associated with adenomyosis and endometriosis include medical management to reduce inflammation and surgical intervention to restore pelvic anatomy. Assisted reproductive technologies (ARTs), such as in vitro fertilization (IVF), are often recommended when conservative approaches fail or when anatomical distortions significantly impact reproductive potential. Evidence suggests that a multidisciplinary approach integrating surgical, medical, and ART modalities provides the most effective management to optimize fertility outcomes in patients with adenomyosis and endometriosis. All types of manuscripts are welcome, including original research articles and reviews (narrative and systematic with/without meta-analysis).

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
