

## Special Issue

# Latest Advances in Catheter Ablation

### Message from the Guest Editors

The transcatheter ablation of cardiac arrhythmias is a reproducible and effective treatment in current clinical practice. Research in this field is constantly evolving in line with innovation, especially in intracavity mapping systems, new forms of energy, and other tools for supporting the transcatheter cardiac ablation of simple and complex cardiac arrhythmias. The multidisciplinary collaboration of anesthesiologists and cardiac surgeons is often required to clinically assess patients with cardiac arrhythmias for hybrid ablations or hemodynamic support, in order to perform redo procedures for atrial fibrillation or ventricular tachycardia with hemodynamic instability. Furthermore, cardiac imaging methods such as cardiac magnetic resonance, cardiac computed tomography, and intracardiac echocardiography play a pivotal role in the assessment of different arrhythmic substrates and in driving ablative treatment. The aim of this Special Issue is to explore the latest innovations in this field, with a particular focus on the latest technical advances related to cardiac arrhythmias and substrates.

### Guest Editors

Dr. Fabrizio Guarracini

Ospedale S. Chiara, Trento, Italy

Dr. Patrizio Mazzone

Department of Cardiac Electrophysiology and Arrhythmology, IRCCS San Raffaele Scientific Institute, 20132 Milan, Italy

### Deadline for manuscript submissions

closed (20 February 2024)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

---

### Editor-in-Chief

Prof. Dr. Edgaras Stankevičius  
Medical Academy, Lithuanian University of Health Sciences, Kaunas,  
Lithuania

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
