Updates on Plastic and Reconstructive Surgery: Current Management of Skin Cancer

Message from the Guest Editor

Skin cancer has a very wide spectrum compared to other types of malignancies. Skin is the largest organ; skin cancer can occur in the scalp, face, upper and lower extremities, hand and foot, chest and abdomen, back, and buttocks. After skin cancer ablation, we have to choose the most ideal reconstructive method. It includes the primary closure, skin graft, local flap, free flap, etc. Each method has its own advantages and disadvantages. The operator has their own opinion and individual experiences. In addition to surgical treatment for skin cancer, cancer immunotherapy is a field that has recently received a lot of attention.

The purpose of this Special Issue is to discuss matters associated with skin cancer and its management. From histology and imaging studies to Definity surgery, each step has its own debate and unsolved problems. The scope of this Special Issue is deliberately broad to encourage the coverage of a wide range of topics and perspectives related to the management of skin cancer. This includes not only surgical treatments but also pathology, immunology, epidemiology, diagnosis, and the latest cutting-edge immunotherapy.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
