Innovative Approaches in Physical Therapy and Rehabilitation

Message from the Guest Editors

The aim of physiotherapy and rehabilitation is to treat, prevent, promote health and improve physical performance. Physical therapy and rehabilitation have undergone significant changes in recent years, adapting to new challenges and the demands of today's society.

As the world's population ages, there are more and more people with chronic diseases or disabilities.

Traditional methods have proven effective over the years, but with rapid advances in technology and research, there is a growing need to explore and implement innovative approaches in this field.

Innovation in physiotherapy and rehabilitation can take many forms, from new therapeutic techniques and exercises to advanced equipment and technologies such as virtual reality, robotics and tele-rehabilitation.

The aim of this Special Issue is to summarize new trends on assessment, prevention and therapeutic approaches in physical therapy and rehabilitation. Original articles, case reports, systematic reviews and meta-analyses are all welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
