Recent Advances in Otolological Diseases

Message from the Guest Editor

Otolological diseases significantly impact quality of life. The COVID-19 pandemic has posed significant challenges to healthcare systems worldwide, including the field of otology. It has highlighted the importance of adaptive healthcare strategies, telemedicine, and the need for robust infection control measures. The scientific community needs to consider the lessons learnt during the pandemic. Recently, artificial intelligence (AI) has emerged as a transformative tool in the field of otology. The integration of AI into diagnostic processes and treatment planning is enhancing the accuracy and efficiency of patient care as machine learning algorithms are being developed to better predict disease progression, personalize treatment plans, and even assist in surgical procedures. This Special Issue aims to gather cutting-edge research on various aspects of otological diseases. We also welcome studies on the pathophysiology of otological conditions and the development of new medical devices. This Special Issue is within the scope of the journal, focusing on both basic and clinical research. In this Special Issue, original research articles and reviews are welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
