

## Special Issue

# Atrial Arrhythmias: Advances in Diagnostic Implications, Clinical Management and Precision Medicine

### Message from the Guest Editors

The global burden of atrial arrhythmias is growing, mostly driven by the increased detection of atrial fibrillation (AF). Catheter ablation is superior to antiarrhythmic drugs to eliminate or reduce AF recurrences, but timely diagnosis and intervention are fundamental. To ameliorate the safety profile of direct oral anticoagulants, recent studies have focused on populations which are under-represented in clinical trials and pharmacological interactions. Moreover, newer anticoagulants are under investigation. Alternative interventional solutions exist for those with contraindication for anticoagulation (i.e., left atrial appendage occlusion). In the near future, genetic testing may help to predict AF onset and recurrence, and could influence the choice of strategy (rhythm vs. rate control) and antiarrhythmic or anticoagulant therapy.

The aim of this Special Issue is to gather up-to-date scientific evidence on the management of atrial arrhythmias, with particular reference to diagnostic implications, clinical management and precision medicine. We are pleased to invite you and your co-workers to submit your original research articles and review articles on this topic.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
