State-of-the-Art Therapeutics and Imaging in Knee Surgery

Message from the Guest Editors

This Special Issue aims to unite the latest/most advanced research and clinical practices that are transforming the field of knee surgery. We invite papers that explore innovative therapeutic approaches and advanced imaging techniques. The topics of interest include, but are not limited to, minimally invasive surgical techniques, regenerative medicine, novel pharmacological treatments, novel surgical approaches and the latest updates in diagnostic imaging modalities such as MRI, CT and ultrasound. We have a particular interest in studies that demonstrate how these advancements are improving patient outcomes, reducing recovery times, and enhancing the precision and efficacy of knee surgeries. Join us in advancing the future of knee surgery through the integration of state-of-the-art therapeutics and medical imaging techniques.
