

## Special Issue

# Advances in Facial Plastic and Aesthetic Surgery

### Message from the Guest Editors

Facial plastic and aesthetic surgery is undergoing a period of rapid evolution driven by technological innovation, refined surgical techniques, and a deeper understanding of facial anatomy, aging processes, and patient-centered outcomes. This Special Issue aims to present and disseminate the most recent advances related to facial plastic and aesthetic surgery, with a focus on innovative surgical and non-surgical techniques, technological developments, outcome analysis, and evidence-based clinical practice. We welcome original research articles, systematic reviews, narrative reviews, technical notes, and high-quality clinical studies addressing both reconstructive and aesthetic aspects of facial surgery, with relevance to contemporary practice and future developments in the field. Topics of interest for publication include, but are not limited to, the following:

- Aesthetic surgery of the face;
- The use of AI in the aesthetic and reconstructive surgery of the face;
- Face and oral reconstruction.
