

Special Issue

Chronic Respiratory Diseases: Updates on Pathophysiology, Symptoms, Diagnosis and Treatment: 2nd Edition

Message from the Guest Editors

Novel aspects of respiratory pathophysiology are being described, new management modalities introduced, and treatment paradigms revisited and modified.

The First Edition of the Special Issue “Chronic Respiratory Diseases: Updates on Pathophysiology, Symptoms, Diagnosis and Treatment” has been a success, attracting multiple submissions. Since the interest in the topic is growing, we decided to continue with the second Edition of the same Special Issue, hoping to respond to the expectations both of the readership and of the prospective contributors.

In this context, we are honored to invite you to submit your valuable contribution to this new Special Issue of *Medicina*, aiming to provide a comprehensive insight into the novel trends in research and clinical management of chronic respiratory diseases, including, but not limited to, asthma, chronic obstructive pulmonary disease, pulmonary fibrosis, chronic rhinosinusitis, allergic rhinoconjunctivitis, and other conditions.

Reviews, original research, clinical studies, as well as real-world data presentations are contribution formats that we invite you to submit.

Guest Editors

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits
