

Special Issue

Ophthalmology: New Diagnostic and Treatment Approaches

Message from the Guest Editors

There have been many recent advances in the diagnosis and treatment of eye diseases. The aim of this Special Issue is to publish new evidence as well as to review the current state-of-the-art developments in the diagnosis and treatment of vision-threatening diseases. These include the following: cornea and external disease; vitreoretinal disease; uveitis; ocular oncology; glaucoma; neuro-ophthalmology; and oculoplastics and orbital disease. Potential cutting-edge topics might include, but are not limited to, the following: new and evolving imaging modalities (including swept source optical coherence tomography and optical coherence tomography angiography), medical therapies (including the new complement inhibitor therapies for geographic atrophy), and surgical approaches. We are soliciting both new research projects (including case reports and small case series) as well as comprehensive review articles of clinically important topics. We are especially interested in the differences in practice patterns between the different parts of the world. For example, endophthalmitis prophylaxis and treatment techniques differ considerably in different geographic locations.

Guest Editors

Prof. Dr. Stephen G. Schwartz

Dr. Krishna S. Kishor

Dr. Víctor Manuel Villegas

Dr. Christopher Leffler

Prof. Dr. Andrzej Grzybowski

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
