Updates on Pancreatic Diseases: A Surgical and Multidisciplinary Approach

Message from the Guest Editors

Pancreatic surgery has been considered a major procedure. It has always represented a challenge for the surgeon due to the technical complexity of the different techniques. These are some of the reasons as to why pancreatic surgery continues to be technically challenging and requires significant experience despite the surgical approach adopted. Pancreatic surgery must be performed by skilled surgeons in high-volume and high-expertise referral centers. Recently, both the indications and the techniques of pancreatic surgery have been evolving. A multidisciplinary approach is needed for accurate decision-making, based on the presumed diagnosis, tumor location, surgical risk, and medical history. This Special Issue aims to discuss heterogenous but inter-related matters associated with benign and malignant pancreatic disease management. We will focus on the state of the art of the different surgical approaches, on updates about evidence-based guidelines while also presenting rare/educational cases and discussing multidisciplinary strategies for pancreatic diseases and future perspectives.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
