

Special Issue

New Research on Endodontic Therapy

Message from the Guest Editors

Over the past decade, we have witnessed significant progress in terms of research and treatment protocols, innovative materials, and techniques in the field of endodontics and endodontic microsurgery. These introductions have advanced the landscape of treatments, prompting clinicians to adapt their workflows and develop new protocols, ultimately enhancing the standard of care provided to patients. This Special Issue endeavors to present a comprehensive overview of the recent research and applications of these materials and equipment. The scope of this Special Issue is intentionally broad, encompassing a diverse array of topics and perspectives within the realm of endodontics and endodontic microsurgery. This includes not only vital and non-vital pulp therapies but also extends to areas such as endodontic microsurgery, intentional replantation, education and research, and complex interdisciplinary strategies involving prosthodontics, periodontology, and orthodontics. We welcome submissions of clinical research and reviews that will further enrich the discourse and advance our understanding of these transformative developments in endodontic and restorative practices.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
