Diagnosis and Treatment of Cervical Cancer: Second Edition

Message from the Guest Editors

Cervical cancer remains a significant global health concern. While its incidence is declining in high-income countries, primarily thanks to healthier prevention strategies, HPV vaccination, and general screening, this malignancy continues to be a major burden in low- and middle-income countries. Persistent infection with high-risk human papillomavirus (HPV) types is recognized as the principal etiological factor. Screening using cytology (Pap test) and HPV-DNA testing permits the early diagnosis and treatment of cervical intraepithelial neoplasia (CIN), preventing the development of invasive cancer. However, disparities in access to screening and healthcare services continue to be a critical challenge. The second volume of this Special Issue aims to provide an updated overview of current evidence regarding cervical cancer diagnosis and treatment. We welcome original research, systematic reviews, and meta-analyses addressing surgical techniques, diagnostic strategies, preventive interventions, and future directions in this field. It is my pleasure to invite you to contribute to this Special Issue, entitled "Diagnosis and Treatment of Cervical Cancer: Second Edition".

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
